## EDUCATION

|             |                                                     |
|-------------|-----------------------------------------------------|
| 2022 – 2026 | <b>B.Tech at Pandit Deendayal Energy University</b> |
| 2022        | Class 12 (GSEB)                                     |
| 2021        | Class 10 (GSEB)                                     |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                           |                             |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| <b>MERN Stack Development Intern</b><br><i>Brainybam Info-Tech Pvt. Ltd., Ahmedabad</i>                                                                                                                                                                                                                                   | <i>May 2025 – July 2025</i> |
| <ul style="list-style-type: none"><li>Worked on full-stack applications using MongoDB, Express.js, React.js, and Node.js.</li><li>Built RESTful APIs and designed responsive UI for performance optimization.</li><li>Collaborated in agile development, participating in sprints, code reviews, and stand-ups.</li></ul> |                             |
| <b>React Developer</b><br><i>Codage Habitation, Ahmedabad</i>                                                                                                                                                                                                                                                             | <i>March 2026 – Present</i> |
| <ul style="list-style-type: none"><li>Worked on ReactJS and NextJS application.</li><li>Learning new technology such as Prisma ORM, GraphQL, Sanity CMS, TanStack Query.</li><li>Collaborated in agile development, participating in sprints, code reviews, and stand-ups.</li></ul>                                      |                             |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                   |                      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Comprehensive Admin Dashboard</b><br>Built a responsive and interactive dashboard using React with charts, tables, and filters. Integrated Redux for state management and REST APIs for real-time data fetching.<br><i>Tech: ReactJS, Redux, Tailwind CSS, REST API</i>                                        | <a href="#">Demo</a> |
| <b>AI-Based Water Quality Monitoring System</b><br>Developed an IoT-powered system using FastAPI and MongoDB to monitor real-time water quality. Integrated ML models for anomaly detection.<br><i>Tech: FastAPI, ReactJS, MongoDB, ML</i>                                                                        | <a href="#">Demo</a> |
| <b>Panchal Art</b><br>Built a responsive web application for Panchal Art using React to showcase portfolio, services, and contact features. Implemented modern UI components and optimized user experience for professional art and signage presentation.<br><i>Tech: TailwindCSS, ReactJS, NodeJs, ExpressJS</i> | <a href="#">Demo</a> |

## TECHNICAL SKILLS

- |                                                                                                                                                                                                                                                                               |                                                                                                                                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li><b>Languages:</b> C++, HTML5, CSS, JavaScript</li><li><b>Frontend:</b> ReactJS, Bootstrap, TailwindCSS, Material UI</li><li><b>Databases:</b> MongoDB, Prisma ORM</li><li><b>Backend:</b> NodeJS, ExpressJS, FastAPI, GraphQL</li></ul> | <ul style="list-style-type: none"><li><b>Tools:</b> VS Code, GitHub, Photoshop, CorelDraw</li><li><b>Other Techs:</b> REST APIs, JSON, Vercel, Netlify, Postman, TanStack</li></ul> |
